

Seven-week course offerings for spring 2022

MCC offers several 7-week classes which breaks the standard semester into two sessions that are 7-weeks each. Offerings are “stacked” so you can take one class and then the next one to complete two sequential classes in one semester. If you take two 7-week classes during the semester, you will be a part-time student; and taking four 7-week classes during the semester makes you a full-time student.

Classes from Jan. 15 through March 7:
